

The first of these is the fact that the
 *Journal of the American Medical Association*
 has been the only one of the four
 journals to publish a special issue on
 the topic of "The Role of the
 Physician in the Health Care
 System." This issue, which was
 published in the November 1988
 issue, was edited by Dr. Robert
 M. G. Anderson, who is the
 President of the American Medical
 Association. The other three
 journals have not published any
 special issues on this topic.
